TABLE OF CONTENTS

Volume 193

ARTICLES

BARRETO, W. and S. ROJAS / An Equation of State for Radiating Dissipative Spheres in General Relativity 201

BENITEZ, J. and O. OBREGON / Non-Singular De Sitter Universe in $R + R^2 - 2\Lambda$ Gravity 95

BENITEZ, J., O. OBREGON, and J. SOCORRO / Supersymmetric Taub Model, the Micro-Superspace Sector 61

CHANDRA, SURESH and LALAN PRASAD / Reply to the Comments from Vinod Krishan on Our Paper 329

EL-SABAA, F. M. F. / Periodic Solutions in the Kovalevskaya Case of a Rigid Body in Rotation about a Fixed Point 309

GURZADYAN, G. A. / Periodicity in Spectral Variations of IC 4997? 105

HOGEVEEN, SAKE J. / Statistical Properties of Spectroscopic Binary Stars 29

KANJILAL, TANUKA and B. BASU / A Study of the Fragmentation of Molecular Clouds and the Form of Initial Mass-Function for Low-Mass Protostellar Fragments 17

KRUOGOVENKO, ANDREI A. and VICTOR V. ORLOV / The Peaks and Gaps in the Redshift Distributions of Active Galactic Nuclei and Quasars 303

MALAKPOUR, I. / Helium Abundance in Novae 47

MELFO, A. and H. RAGO / Conformally Flat Solutions to the Einstein-Maxwell Equations 9

MOHAN, C., ARVIND KUMAR LAL, and V. P. SINGH / Equilibrium Structure of Differentially Rotating Polytropic Models of the Stars 69

MUSTAFA. ERROL and JEFFREY M. COHEN / Weak Field Limit and Tests of a Relativistic Theory of Gravity 1

QUIROGA, R. J. and A. CLARET / Some Applications of Jacobi Dynamics to the Stellar Evolution 185

QUIROGA, R. J. and A. CLARET / The Stars in the Main Sequence and Their Dynamical Parameters 235

QUIROGA, R. J. and J. C. MELLO / Period Distributions in Pulsating and Binary Stars 247

SÉRSIC, J. L. and C. J. DONZELLI / Digital Photographic Photometry of NGC 5253 and NGC 2915 87

SHAH, G. A. / Geometrical Optics and Diffraction Vis-à-Vis Mie Theory of Scattering of Electromagnetic Radiation by a Sphere 317

SHARAF, AMR A. / Orbit Computations with the Eulerian Topological Regular Elements with Oblateness 109

SHENGLIN, CAO / Theory of Relativity and Super-Luminal Speeds. IV. The Catastrophe of the Schwarzschild Field and Superluminal Expansion of Extragalactic Radio Sources 123
SONG, SEUNGHEON, C. W. JUNG, S. Y. KIM, and YOUNGBO CHOI / Computer Simulation of Three-Dimensional Stellar Systems in Cylindrical Coordinates 217
TAKASHIMA, T. and K. MASUDA / Emergent Radiation from the Atmosphere Bounded by the Two Half Lambert Surfaces Composed of Different Albedo, II 289
TEREBIZH, V. YU. / Statistical Parameterization of Inverse Problems 269
TROFIMENKO, A. P. / Physics of the Earth and Otons 51
XIE, G. Z. and J. H. FAN / The Number-Density of Stars in a Spherically-Symmetric System Containing a Massive Black Hole at Its Center 99
YABUSHITA, S. / Similarity between the Structure and Stability of Isothermal and Polytropic Gas Spheres 173

LETTERS TO THE EDITOR

KUNDT, WOLFGANG and HSIANG-KUANG CHANG / Pulsar Nebulae 145
SANIGA, METOD / Conformally Symmetric Abelian Higgs Sunspot and Non-Metricity of the Sun's Spacetime 155
WICKRAMASINGHE, N. C., A. N. WICKRAMASINGHE, and F. HOYLE / The Absorption of Electromagnetic Radiation by Metal Cylinders of Finite Length 141

BOOK REVIEWS

Bertotti, S., *et al.* (eds.), *Modern Cosmology in Retrospect* (ATTILA MÉSZÁROS) 333
Blair, D. G. (ed.), *The Detection of Gravitational Waves* (ATTILA MÉSZÁROS) 333
Bray, R. J., *et al.*, *Plasma Loops in the Solar Corona* (MAREK WOLF) 334
Itzykson, C. and J.-M. Drouffe, *Statistical Field Theory* (R. KOTECKÝ) 163
Jaschek, C. and Y. Andrillat (eds.), *The Infrared Spectral Region of Stars* (MAREK WOLF) 334
Leitherer, C., *et al.*, *Massive Stars in Starbursts* (MAREK WOLF) 335

Meeting Report 161

The Use of the "SPACEKAP" Style File for Delivering Manuscripts in LaTeX 165, 337

List of Forthcoming Papers 171, 343
